

SERVICE ONE-PAGER

The 24/7 Lab IT Standard

Your lab never closes. Your IT support should match it.

The operational standard diagnostic labs need when instrument uptime, result turnaround, and data integrity run continuously.

01

Instrument interfaces and result delivery are monitored continuously, so a failed connection is caught before clinicians notice.

02

Backups, encryption, and access controls meet the integrity requirements that lab accreditation and HIPAA demand.

03

Support is structured around result turnaround time, because a delayed result is a delayed care decision.

PROOF

Labs running continuous interface monitoring resolve connectivity faults in minutes instead of the hours typical of reactive support.

Request a 24/7 lab IT standard assessment.

About Millennial Networks: We are a healthcare technology partner serving Community Health Centers, diagnostic labs, and clinical networks across Puerto Rico, USVI, and Florida. Humans First, Tech Second.
