

PRODUCT ONE-PAGER

MediBOT in 60 Seconds

MediBOT works your back office so your people can work your patients.

A trained AI Agent that handles eligibility, prior authorization, and revenue cycle work inside your existing systems, around the clock.

01

MediBOT runs eligibility verification, prior authorization, RCM follow-up, and document chase as a Digital Staff Member, not another login your team has to manage.

02

It operates inside the systems you already own, including eClinicalWorks, with a human-in-the-loop checkpoint on every clinical or financial decision.

03

You add capacity without adding headcount, and you keep full control over what MediBOT is allowed to touch.

PROOF

A single eligibility cycle that takes staff 6–9 minutes per patient runs in under 60 seconds with MediBOT.

Talk to us about a 90-day MediBOT deployment for your Community Health Center.

About Millennial Networks: We are a healthcare technology partner serving Community Health Centers, diagnostic labs, and clinical networks across Puerto Rico, USVI, and Florida. Humans First, Tech Second.
